## **ECONOMICAL Mini-Switch™**

### Ultrasonic Point Level Switch

## *Mini-Switch™ Ultrasonic GAP Sensing Technology*

Model LL-01

### **IDEAL FOR:**

- ◆ Various OEM Applications
- ◆ Semiconductor Equipment
- ◆ Pump Protection
- ◆ Storage Tanks
- ◆ Compressors
- ◆ Medical Devices
- ◆ Hydraulic Supply Lines
- ◆ Sewage Systems
- ◆ Pipe Lines

### ADVANTAGES

Sealed integral electronics

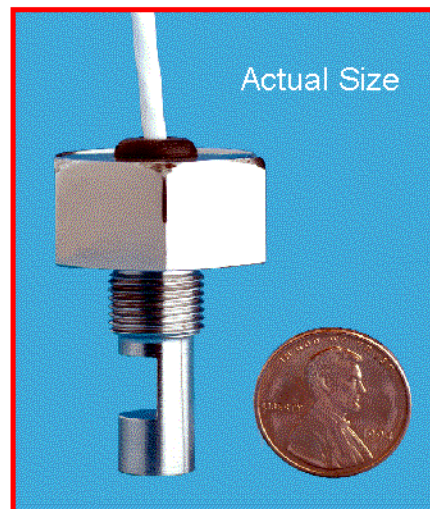

No moving parts; Easy to install

All wetted parts 316 Stainless Steel

Intrinsically safe model LL-01

(when used with intrinsic safety barrier)

Low cost replacement to mechanical float

The Mini-Switch™ LL-01 Point Level Switch is the IDEAL direct replacement for electro-optical, mechanical float or capacitance liquid level switches. It utilizes field proven ultrasonic GAP technology and microprocessor based integral electronics.

The **HiTECH** Min-Switch™ provides very reliable performance in virtually any liquid, regardless of the viscosity. The Min-Switch™ ultrasonic GAP sensing eliminates mechanical failure problems inherent with mechanical floats.

Incorporating integral and totally sealed electronics, the Mini-Switch™ is designed to provide many years of maintenance-free service.

**Large OEM DISCOUNTS available**
