DigiCap™ is **HiTECH's** unique **Digital Capacitance Two-Wire Level Transmitter**, the ideal choice for general purpose level applications involving liquids or solids.

The **DigiCap™** measures level based on changes in the electrical capacitance between the sensing element and earth ground. The technology is applicable for either conductive or insulating materials.

Its' wide measurement range and its' 1-1/2" NPT mounting make the **DigiCap™** well suited for many applications including; liquids, slurries, powders, and granulars, vaporous chemicals, viscose and/or corrosive materials, as well as processes involving high pressure, high temperature or vacuum.
